Projects

E-commerce store

<https://66b683b218f5a574d787cd5e--stunning-scone-d2b5a4.netlify.app/>

Description:

- This is a E-comm store build using JavaScript, featuring comprehensive cart functionality for shopping experiences.

Plant Website Landing page

<https://ujef55.github.io/Plant-Website/>

Description:

- I developed a plant website landing page using HTML and CSS. This project showcases my skills in front-end web development and creativity in designing user-friendly interfaces.

Health Care Application

<https://ujef55.github.io/health-care/>

Description:

- I designed and implemented a healthcare application using JavaScript, which utilizes a patient data API to dynamically fetch and visualize health metrics such as blood pressure, heart rate, and other vital statistics. The app features interactive graphs that provide insightful data representations, enhancing user understanding and facilitating informed healthcare decisions.

Sticky Notes

<https://ujef55.github.io/Notes/>

Description:

- I developed this practical sticky notes web application using JavaScript. This demonstrates my skills in JavaScript programming and creating functional web applications.

Projects

Match The Words game

<https://ujef55.github.io/Match-Word/>

Description:

- I implemented a minimal game with the help of JavaScript programming, Combining logic and interactivity. This showcase my JavaScript skills.
